

Cal High Robotics

SPONSORSHIP DETAILS

CALHIGHROBOTICS.ORG

WHO WE ARE

We as an organization compete under team number 1516 in the VEX Robotics Challenge, under two teams, A and B. Our teams have qualified for states two times in a row and have shown excellent progress towards reaching worlds. We also host workshops and camps for middle schoolers in order to help foster an interest in STEM within the community and create a welcoming environment for those who are willing to learn. We also host a local competition program for teams within our high school, which functions as both a recruitment mechanism and to further enrich the students at our school and provide opportunities for STEM on campus.

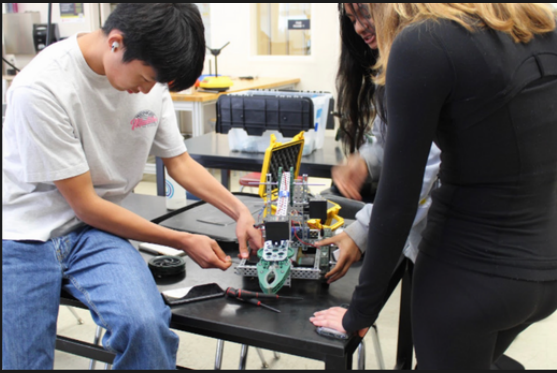

WHY SPONSOR US?

We need money in order to help keep our club afloat. This is due to expenses like our summer camp, middle school event, and buying materials for our novice program. All the money we receive goes into further enriching the opportunities our community has in the field of STEM. While we do get donations and dues from members, it does not go far as we wish to keep costs low to increase accessibility. We also do not have enough funding in order to provide more materials for our existing teams and create new teams as the number of interested students rises. Your donation will play an important role in helping inspire the next generation of kids in STEM

WHERE DO WE USE FUNDS?

YEAR ROUND

We use money year-round in order to get teacher supervision and materials for our novice "cubs" program where we **teach people how to build and code in robotics**, currently, we wish to upgrade the systems and need around 7k of funding to accomplish this goal. We also use funds to maintain proper materials and resource availability for our competition teams.

MIDDLE SCHOOL EVENT

We host an annual middle school event in order to **generate interest in STEM** in middle schoolers across the district. As registration fees are minimal to improve accessibility, we require

funds to cover the supervision and material costs to keep this event afloat.

SUMMER CAMP

On the same note as the middle school event, we host a 2-week long summer camp in order to help **foster interest in STEM**

for people considering entering robotics. We require funding in order to maintain proper facilities for the experience, especially due it to being outside of the school year. This event will also pave the way for future ventures in the space of middle school robotics set by our club.

SPONSORSHIP TIERS

As we continue to work towards our goal of making an impact in the realm of STEM education, it is vital that we also have sufficient funding in order to achieve our goal. This is where you come in, helping us fund our goal. In order to let you donate within your comfort zone, we have 4 tiers of sponsorship. The tiers are **platinum**, **gold**, **silver**, and **bronze**.

Benefits	Platinum \$2500+	Gold \$1500-\$2499	Silver \$750-\$1499	Bronze \$250-\$749
Logo on Website	✓	✓	✓	✓
Logo on Social Media Pages	✓	✓	✓	✓
Logo on Club Merch	✓	✓	✓	✗
Logo on Club Posters	✓	✓	✗	✗
Logo on Trifold (brought all events/comps)	✓	✓	✗	✗
Mentioned at all Events/Meetings	✓	✗	✗	✗
Sticker on Robot (brought to all events/comps)	✓	✗	✗	✗

We are always open to discussing a custom sponsorship package to best suit your company's needs

HOW TO SPONSOR US?

As circumstances may vary regarding methods of payment, we are willing to see which method may be convenient for all of us, so please email the address below stating your intent to sponsor! All donations will be **tax-deductable**.
